MEMORANDUM FOR: Executive Officer, IC Staff

SUBJECT: USIB/IHC Weekly Activities Report

I. NEW ITEMS

A. Intelligence Use of Defense Satellite Communications System (DSCS): ASD(I) requested the concurrence and support of the DCI in ASD(I)'s plan to designate a point of contact in his office for coordinating intelligence community communication requirements levied against the Defense Satellite Communications System (DSCS). A meeting was held with Mr. Albrecht, the proposed point of contact, to review the implications of this action. A letter is being prepared for the DCI's signature concurring in this proposal and designating a representative of the IC Staff to work with Mr. Albrecht on this assignment. Now going through coordination at CIA. Action Officer: IHC/ [redacted]

25X1

B. Computer Graphics: Met with [redacted] Chairman, COMIREX Computer Graphics Working Group, to discuss the work of his group and to coordinate COMIREX and IHC studies on aspects of this broad subject. COMIREX focus is on mapping; IHC focus is on a broad survey of the state of techniques to improve intelligence presentations. Action Officer: IHC/ [redacted]

II. ON-GOING ACTIVITIES

A. Imagery Dissemination in the Washington Area: CIA/OC and IHC Staff have drafted a statement on the technical characteristics and funding profile for this dissemination system. A memo from D/DCI/IC to the CIA Comptroller requesting that the funding and budgeting for the system be implemented is in the process of coordination within CIA. Negotiations will be initiated shortly with Harris Corporation of Melbourne, Florida, who will be the contractor, on an engineering definition of the system. Action Officer: IHC/ [redacted]

25X1

B. Community Inventory of Automated Data Systems (CIADS): Selected information extracted from CIADS has been provided for [redacted] a classified Navy contractor, in response to an official Navy request. Action Officer: IHC/ [redacted]

C. CONTEXT Testing: Conferencing tests were conducted between the CONTEXT terminal in IHC's offices and the second terminal recently installed in the CIA Operations Center. These tests were conducted via [redacted] computer at NSA, without the use of the third terminal at NSA, and were very successful. The tests provide preliminary data on the feasibility

of selectively designating and using some but not all terminals in a single network. This is one of an extensive series of tests to develop the full potential of CONTEXT. Action Officers: IHC/

25X1

D. CONTEXT/OMNITEXT Interface: A meeting was held on 27 May 1975 with CIA/OCI personnel to explore interface requirements between CONTEXT and OMNITEXT, which is a means of transferring edited intelligence reports directly to the printing plant. Following the acquisition and installation of additional hardware for OMNITEXT, which is planned for early FY 76, it is highly probable that an interface capability can be developed. This would provide for speedy publication of the CONTEXT product. This is one specific follow-up to improve the versatility of CONTEXT as a crisis management tool. Action Officer: IHC/
